**HAL** is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

## Editorial Message

### Track on Software-intensive Systems-of-Systems (SiSoS) of the 33rd ACM/SIGAPP Symposium On Applied Computing (SAC 2018)

---

Khalil Drira, LAAS-CNRS – Univ. Toulouse, France

Flavio Oquendo, UMR CNRS IRISA – Univ. Bretagne Sud, France

Axel Legay, INRIA, France

Thais Vasconcelos Batista, DIMAp – UFRN, Brazil

## Scope

---

Pervasiveness of networks has made possible to interconnect systems that were independently developed, operated, managed, and evolved, yielding a new kind of complex system, i.e. a system that is itself composed of systems, the so-called System-of-Systems (SoS). Software-intensive SoS (SiSoS) has become a hotspot in the last years, from both the research and industry viewpoints. Indeed, various aspects of our lives and livelihoods have progressively become dependent on some sort of Software-intensive SoS. This is the case of SiSoS found in different areas as diverse as energy, healthcare, manufacturing, and transportation; and applications that address societal needs, e.g. environmental monitoring, distributed energy grids, emergency coordination, global traffic control, and smart cities. Moreover, ubiquitous platforms such as the Internet of Things and nascent kinds of SoS such as Cyber-Physical SoSs are accelerating the deployment of Software-intensive SoS in the near future. Definitely, the unique characteristics of Software-intensive SoS raise a grand research challenge for the future of software-reliant systems in our industry and society due to its intrinsic features, among which evolutionary development and emergent behavior.

## Statistics

---

The SiSoS Track received 22 regular paper submissions and 3 SRC submissions. Each submission was reviewed by three members of the Track Program Committee. The Track Program Committee selected 5 full papers out of the 22, giving an acceptance rate of 23%. These papers were selected based on originality, quality, soundness, and relevance to this conference track. Moreover, 2 poster papers have been accepted for publications in the proceedings of the conference.

## Key Topics

---

This track fosters (but is not limited to) submissions in the following topics:

- **SiSoS Mission**
  - Specification and analysis
  - Formal contracts, contract-based approaches
  - Goal-orientation, task orientation
  - Ontologies, reasoning
  - Relationships with emergent behaviors
- **SiSoS Modeling**
  - Model-driven engineering
  - Models-at-runtime

- Model-based approaches
  - Formal modeling foundations
- **SiSoS Design**
  - Architectural and detailed design
  - Design evaluation
  - Correction by design
  - Design for evolution, scalability or
  - Design for emergent behavior
- **SiSoS Verification and Validation**
  - Testing
  - Compositional/statistical model checking
  - Simulation, co-simulation
  - Simulation of emergent behaviors
- **SiSoS Construction and Evolution**
  - Evolutionary development
  - Correction by construction
  - Techniques & technologies for SoS engineering
  - Service-orientation
  - Component and middleware frameworks
- **SiSoS Security and Privacy**
  - SoS cybersecurity
  - SoS privacy and trust
  - Security against emergent behaviors in SoS
- **SiSoS Experience**
  - Reports from real projects
  - Case studies in real-scale projects
  - Controlled experiments
  - Experience from SoS stakeholders
- **SiSoS General issues**
  - Taxonomies, ontologies
  - Software processes
  - Project management
  - Acquisition in the development of SoS
- **SiSoS Applications**
  - Energy
  - Transportation
  - Global traffic control
  - Emergency coordination
  - Environmental monitoring
  - Smart grids
  - Healthcare
  - Manufacturing
  - Smart cities
  - Any other application domain
- **Future perspectives, challenges, and directions**

## Acknowledgment

---

We would like to thank the members of the Track Program Committee for providing thoughtful and knowledgeable reviews and for their substantial effort in making SiSoS a successful conference track.

## Track Program Committee

---

- Nicola Accettura, LAAS-CNRS, France
- Jesper Andersson, Linnaeus University, Sweden
- Paris Avgeriou, University of Groningen, The Netherlands
- Jakob Axelsson, SICS Swedish ICT, Sweden
- Muhammad Ali Babar, University of Adelaide, Australia
- Fabrizio Biondi, INRIA, France
- Ismael Bouassida Rodriguez, REDCAD, Univ. Sfax, Tunisia
- Jan F. Broenink, University of Twente, The Netherlands
- Henry Broodney, IBM Watson IoT, USA
- Everton Cavalcante, Federal University of Rio Grande do Norte, Brazil
- Carlos E. Cuesta, Rey Juan Carlos University, Spain
- Remco de Boer, ArchiXL, The Netherlands
- Flavia C. Delicato, Federal University of Rio de Janeiro, Brazil
- Remo Ferrari, Siemens Industry, USA
- Juan Garbajosa, Technical University of Madrid, Spain
- Gilles Geeraerts, Université libre de Bruxelles, Belgium
- Bernhard Josko, OFFIS, Germany
- John Klein, Software Engineering Institute, USA
- Charles Kremer, IRT SystemX, France
- Patricia Lago, Vrije Universiteit Amsterdam, The Netherlands
- Kim G. Larsen, Aalborg University, Denmark
- Nazim H. Madhavji, University of Western Ontario, Canada
- José Carlos Maldonado, University of Sao Paulo, Brazil
- Tiziana Margaria, University of Limerick & Lero, Ireland
- Raffaella Mirandola, Politecnico di Milano, Italy
- Elisa Yumi Nakagawa, University of Sao Paulo, Brazil
- Linda Northrop, Software Engineering Institute, USA
- Alvaro Oliveira, Smarter City Services, Portugal
- Roberto Passerone, University of Trento, Italy
- Patrizio Pelliccione, Chalmers Univ. & Univ. of Gothenburg, Sweden
- Jennifer Pérez, Technical University of Madrid, Spain
- Paulo Pires, Federal University of Rio de Janeiro, Brazil
- Jean Quilbeuf, IRISA - University of South Brittany, France
- Ralf Reussner, KIT / FZI, Germany
- Heinrich Schmidt, RMIT University, Australia
- Sarah Sheard, Software Engineering Institute, USA
- Bedir Tekinerdogan, Wageningen University, The Netherlands
- Louis-Marie Traonouez, INRIA, France
- Petr Tuma, Charles University, Czech Republic
- Danny Weyns, KU Leuven, Belgium
- Brian White, CAU-SES, USA
- Xiwei (Sherry) Xu, Data61 / CSIRO, Australia
- Uwe Zdun, University of Vienna, Austria
- Huibiao Zhu, East China Normal University, China
- Andrea Zisman, The Open University, UK
