HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

A user privacy-centric access control policy of data for intelligent transportation systems

Rémi Adelin, Eric Alata, Vincent Migliore, Vincent Nicomette

LAAS-CNRS, Université de Toulouse, CNRS, INSA, Toulouse, France

Context

- Vehicles are more and more connected
- Loss of control of personal data by drivers
- Access control policy

Access control policy

- 1) Encrypted storage
- 2) The driver defines the access control
- 3) Exceptionally exceeding rights

Key-Policy Attribute-Based Encryption

Decryption Key

Ciphertext

Encryption / Decryption

Encryption Key

Attributes

Encrypt

Decryption Key

Decrypt

Architecture

Attributes

- Role related
- Data type related
- Contextual information
- Privacy related

Access tree

Data sending

mandatory attributes

driver attributes

GPS

time

Cryptographic module

Wireless interface

Data tagging

Future work

- Implementation
- Authentification
- Integrity check
- Efficiency
- Attributes space
